SUZUKI ULTIMATE RIGGING SELECTOR

The Suzuki Ultimate Rigging Selector is a new website that Suzuki has developed. The website is designed to assist users in choosing the part numbers they will need for their desired application.

It will help shorten search times and improve search accuracy. The Suzuki Ultimate Rigging Selector currently consists of 3 sections: Rigging Matching, Parts List, and PDF.

Website Top Page

Website address: <https://www.globalsuzuki.com/marine/SuzukiUltimateRiggingSelector/>

Rigging Matching

The Rigging Matching section will assist users in identifying the appropriate rigging combinations along with their preferences. The system automatically narrows down matching results using minimal clicks, and the required items will be listed as shown below.

| Required Items | PART NUMBER | NAME | QTY | NOTES | REMARKS |
|---------------------|-----------------|--|-----|-----------------------------|---|
| KIT | 67000-98L03-000 | KIT, SINGLE ENGINE, 1st station | 1 | Kit details | |
| A | 37100-98L00-000 | MAIN SWITCH PANEL | 1 | | |
| B | 37803-98L00-000 | EMERGENCY SWITCH PANEL | 1 | | |
| C | 36620-98L00-000 | MAIN WIRING HARNESS(6.5m / 21.3ft) | 1 | | |
| D | 36620-98L20-000 | MAIN WIRING HARNESS Extension (2m / 6.5ft) | 1 | Optional | |
| E | 37860-98L00-000 | TROLL MODE SWITCH PANEL | 1 | Optional | |
| GAUGE | 34011-96L44-000 | SUZUKI MULTI-FUNCTION GAUGE (SMG4) | 1 | | |
| GAUGE | 36001-88L00-000 | CABLE KIT for SMG4 | 1 | Kit details | MSC Single-source: Check kit details in Parts List Section. |
| Optional 1-1 | 34190-88L00-000 | SENSOR ASSY, PADDLE WHEEL (Speed Over Water) | 1 | Optional | MSC Single-source: 9900C-88317-000 |
| Optional 1-2 | 39950-88L02-000 | GPS RECEIVER MODULE (Speed Over Ground) | 1 | Optional | |

Integrated Control System

"SYNCRO-EYE" is a comprehensive system Suzuki has developed which "connects" various devices so that they work together in synchronisation. This innovative system will also improve the control technology of the boat by "sensing" various situations surrounding the boat. Synchro Eye will also ensure compliance with compatible future technologies.

SYNCR0-EYE

SUZUKI PRECISION CONTROL

Suzuki Precision Control (Drive-By-Wire) is a technologically advanced computer-based control system with electronic wiring that eliminates sources of friction and resistance. While you enjoy smooth throttle and shift operation, the system's computer is processing and transmitting commands in real-time to actuators on the engine that deliver precise throttle controls with smoother, decisive shifting.

Suzuki Precision Control (SPC) features:

- Control of up to 6 OBM units.
- Automatic Trim available by using SMD or SMG4.

Find out more here:

Remote Control Box

- Integrated SELECT and THROTTLE ONLY switches.
- 1-lever operation for multiple outboards (Dual Top Mount).

Single Top Mount

Dual Top Mount

Flush Mount

Integrated emergency stop switch (Flush Mount Only)

Switch Panels

- Mounting bolts concealed for a smooth finish.
 - 1 action start/stop for multi-installation boats. (Engines start in order from port to starboard)
- ➔ See page 12 for a reference of switch panel selection.

EXTRA OPTION

COUNTER SELECT CONNECTOR

36612-98J20-000

Applicable Model DF150AP/175AP/200AP,
DF250AP/300AP

Converts to counter rotation specification.

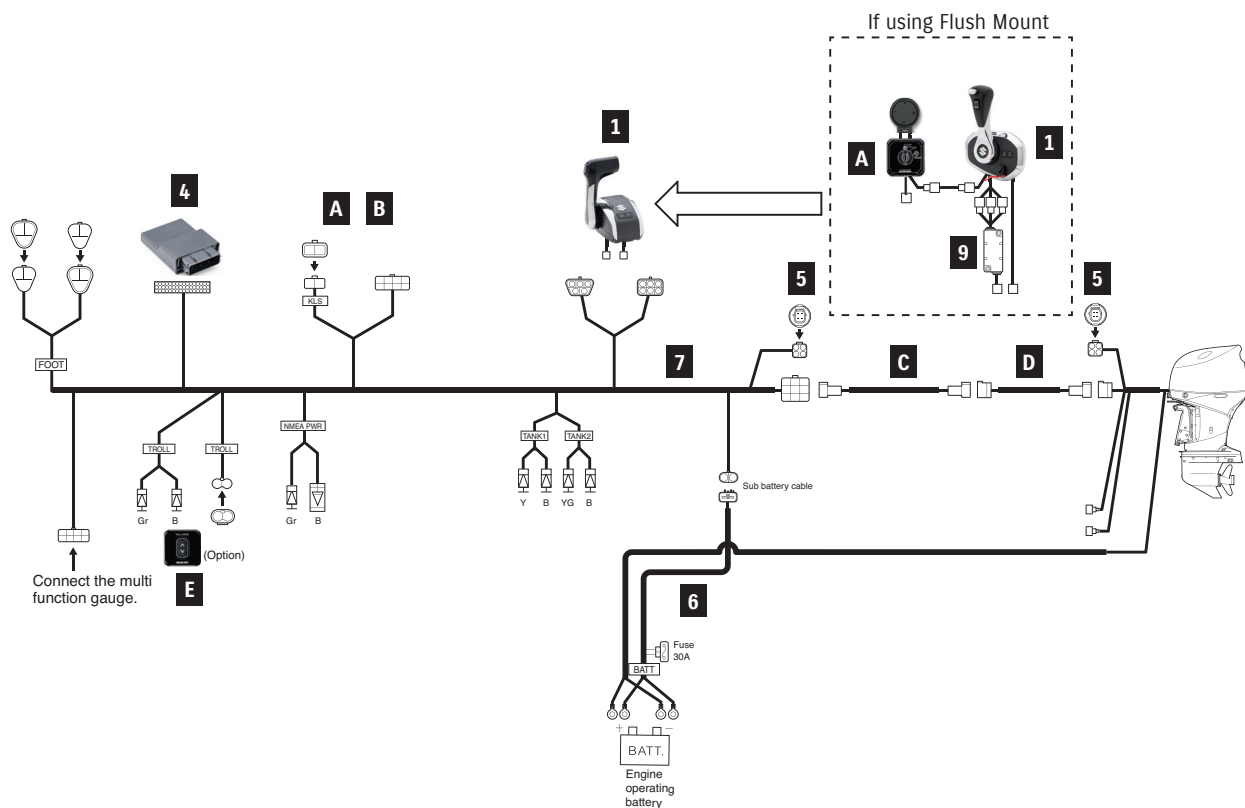

Suzuki Selective Rotation

In multi-outboard installations on large boats, a counter-rotation outboard is usually paired with a regular rotation model to help keep the boat travelling on an even keel and in a straight line. Suzuki Selective Rotation eliminates the need to purchase a dedicated counter-rotation outboard by using a special switch that turns a regular rotation outboard into a counter-rotation model.

REMOTE-CONTROL KIT

SINGLE ENGINE

Items A ~ F are not included in the Kits. Please purchase them separately.

*Required when using 37100-98L00 or 37290-98L00 with TOP MOUNT.

MECHANICAL REMOTE CONTROL

For mechanical control models from year 2023, Suzuki introduced a new main wiring harness. This harness enables CAN connection, which allows mechanical models to use functions that were previously exclusive to SPC models.

By using with the SMG4, it also enables the automatic trim and utilisation of the new Keyless Start System*.

Functions available using the CAN Harness

| | DF40A-60A | DF70A-100B | DF100C-140B | DF150A-200A | DF200-250 |
|--------------------------|-----------|------------|-------------|-------------|-----------|
| CAN Connection | ✓ | ✓ | ✓ | ✓ | ✗ |
| Automatic Trim | ✗ | ✗ | ✓ | ✓ | ✗ |
| New Keyless Start System | ✗ | ✓ | ✓ | ✓ | ✗ |

*If using the new Keyless Start System, please ensure to use the new switch panels.

The Keyless Start System is only available in limited regions. If you are not sure about your market, please check with your country coordinator.

Activates SUZUKI Troll Mode
System and controls RPM
from idling engine speed up to
1200rpm at every 50rpm.

SUZUKI TROLL MODE SYSTEM

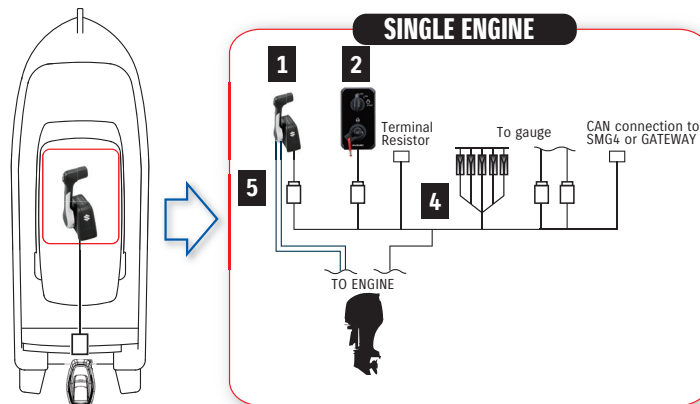

Troll Mode Switch:

An option for Remote Control models from DF40A and over, this system allows the user to adjust engine speed in 50rpm increments, giving highly precise control at low revs. With its own tachometer and control switch, it works alongside our multi-function gauges and analogue gauges.

(**Tiller Handle** Models from DF40A and over have Suzuki Troll Mode System as standard equipment)

*Not Applicable for DF250/225/200, DF250W, DF150W, DF90AWQH

SUZUKI MULTI-FUNCTION GAUGE

The Suzuki Multi-function Gauge (SMG4) shows all the necessary information on one, user-friendly screen. Users can view a wide range of important information, including engine rpm, speed and trim angle, engine temp, fuel economy and total fuel flow for multiple engine installations.

The SMG4 also shows alerts from the engine's sensors and warning systems.

ANALOGUE TACHO & SPEED MODE

TACHO MODE

TROLL MODE FUNCTION

- Allows you to control your troll mode from the Multi-Function Gauge

This function is available from year 2019 models. Can only be used by models which are adapted to troll mode.

* Speed sensor or GPS module required.

| | GPS Module | Speed sensor |

SUZUKI DIAGNOSTIC SYSTEM MOBILE PLUS

The Suzuki Diagnostic System Mobile Plus (SDSM+) is an app that combines the existing functions of the former SDSM app with added features to support our customers' boating experience. With a few screen taps and a simple QR code scan, the app guides customers from boat day planning, all the way to their next scheduled engine service.

The SDSM+ app is free of charge and is available to download using a suitable smart device.

What can SDSM+ Do?

- Provide boating condition forecasts all in one screen.
- Guide customer through pre-departure inspection.
- Receive and display engine operating data by scanning a QR code. The app also allows the customer to send this data to their dealer by e-mail.*
*SMG4 (Page 34) or SMD is necessary for this feature.

Find out more at global website here! 

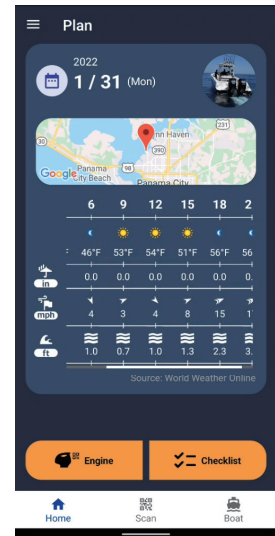

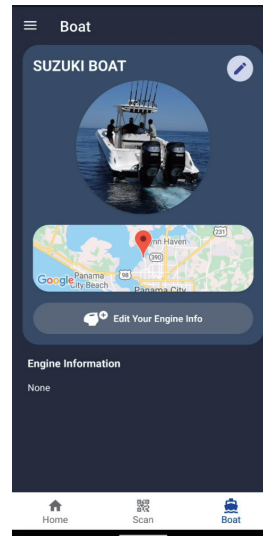

Or go to https://www.globalsuzuki.com/marine/sdsm_plus/

**QR Code is a registered trademark of DENSO WAVE.*

Prior to departure

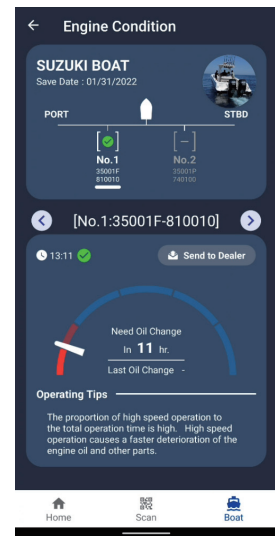

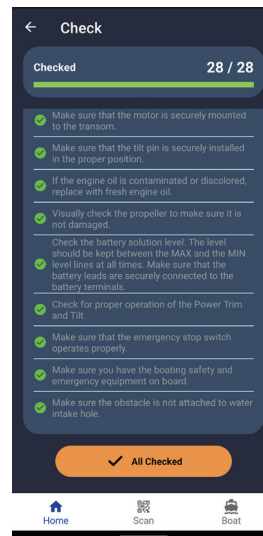

Customer will first register their boat and engine(s) information on to the app. The customer can then select a boating date and destination to check the weather forecast.

Upon departure

The app will show a pre-departure checklist to inspect the boat and engine(s).

Customer can also scan the QR code on the SMG4 or SMD to check engine operating data. The app will also provide operating tips based on piloting tendencies.

Upon return

Customer can scan the QR code again to check the latest engine data.

After checking, the customer can e-mail the data to an authorized Suzuki dealer.

The dealer can use this data to prepare for the customer's next scheduled engine service.

The SDSM+ app is subject to updates and other changes. Images in this catalogue may differ from the actual screen.

SUZUKI PROPELLERS

WATERGRIP

WATERGRIP is a stainless-steel propeller series offering accurate response to user operation. Converting engine power into propulsion with high efficiency, this propeller series meets our customer's demand for bigger, faster, more powerful outboards.

The WATERGRIP propeller series employs a new interchangeable and square shaped propeller bush that minimises power loss in delivery.

*This picture was taken remotely

WATERGRIP

The WATERGRIP series will be the new standard for Suzuki propellers. The interchangeable square-shaped bush system is designed for quick and easy replacement when required, and also accurately and efficiently converts power from the engine to thrust through the propeller.

WATERGRIP DUAL

Our flagship models, the DF350A, DF325A and DF300B, introduced the Suzuki Dual Prop System, an industry-leading technology, which delivers outstanding and exciting performance. The two contra-rotating propellers, operating simultaneously, enables greater conversion efficiency as well as better stability, grip, and manoeuvrability.

WATERGRIP SPORT

The WATERGRIP SPORT propellers feature a high rake blade design for excellent acceleration and exceptional top speed. These propellers are ideal for lightweight sports boats as they give remarkably stable thrust when turning for superior manoeuvrability.

PROPELLER BUSH ADVANTAGES

Interchangeable bush with better resistance over propeller slip

Better resistance over propeller slip
Interchangeable bush

Choosing The Right Propeller

Propeller selection is very important in the performance of the boat. Acceleration, speed, fuel efficiency, stability and engine RPM all are affected by the propeller. Operating requirements and conditions will also determine which design, style and pitch of the propeller your customer can choose. The combination of boat, engine and appropriate propeller size may have already been tested by the boat manufacturer.

Your Customer may need your assistance to determine the correct propeller for their application.

Stainless Steel Propellers

Suzuki Stainless Steel Propellers offer high performance and durability. Their aggressive design enhances the overall performance of the boat and the durability of stainless steel ensures long term dependability. Suzuki Stainless Steel propellers are also fitted with a rubber cushion hub to help absorb vibration and shock should they strike a foreign object.

Propeller Sizing

When referring to propeller size, the first number is the number of blades, the second number details the **diameter** of the propeller, and the third number is the **pitch**. Example: **3 x 13 x 18** = 3 blades x Diameter: 13 inches x Pitch: 18 inches.

The pitch is the most significant factor when choosing a propeller.

Diameter

Diameter is the distance across an imaginary circle that is made when a propeller rotates. Diameter is determined during the designing process of a propeller and is usually based on engine size, gear case design, horsepower and speed.

Pitch

Pitch is the theoretical distance that a propeller corkscrews forward through the water. In theory, an 18"(457.2mm) pitch propeller would travel 18"(457.2mm) with each complete revolution*.

Lower pitches accelerate faster, but have lower top end speed. Higher pitches have a slower acceleration, but attain higher top speeds. An inch of pitch is generally equal to 150-200 engine RPM at wide open throttle (WOT). If pitch increases by an inch, RPM will decrease by 150-200 RPM at WOT. If pitch decreases by an inch, RPM will increase by 150-200 RPM at WOT.

*Note during actual operation, this number will be affected by slip factors such as water conditions, boat weight, propeller style, etc.

Propeller Cup

Cup is the curve along the trailing edge of the propeller blade. This reduces propeller slip and ventilation, allowing users to operate their engine at a higher transom mounting, and use more trim for bow lift.

Rake

Rake is the angle, in degrees, that the propeller blades are mounted to the barrel of the propeller. Blades of a zero degree rake propeller are mounted perpendicular to the barrel. High rake propellers have blades that angle more to the rear of the propeller. These blades hold water longer and ventilate less at higher engine heights.

Such propellers produce higher thrust which helps lift the bow of the boat more effectively.

MAINTAINING YOUR SUZUKI

MOTUL Outboard Tech 4T 10W40

Technosynthese® lubricant, reinforced with synthetic base stocks, is specially designed for use in marine 4-stroke engines running in severe conditions, calling for NMMA FC-W lubricants, outboard and sterndrive.

- Formulated with anti-foam properties to avoid the introduction of foam and air bubbles into the oil circuit
- Better oxidation resistance
- Anti-clogging properties to protect oil filters
- Higher HTHS viscosity at 150°C ensures better oil film resistance at high temperatures and absorbs fuel dilution produced during long idle periods
- Perfect shear resistance to maintain lubricant performance at high temperatures
- Outstanding anti-corrosion properties to avoid corrosion due to sea water or salt water fog that can reach the combustion chamber through the exhaust pipe
- Keeps lubricant original properties even when contaminated by sea water
- SAE 40 viscosity grade at high temperatures for severe conditions and warm climates

Advantage of MOTUL Outboard Tech 4T 10W40

Superior Engine Protection

The oil's anti-fogging and clogging properties help to protect the engine when starting in cold temperatures.

Fuel Efficiency

Ingenious advanced formula delivers high performance and fuel savings.

Prolonged Engine Life

Advanced cleaning properties in the oil supports the engine's lifespan.

To order MOTUL Outboard Tech 4T 10W40, please contact Moto Direct: sales@moto-direct.com 01773864420

THE ULTIMATE OUTBOARD MOTOR

Please read your Owner's Manual carefully. Remember, boating and alcohol or other drugs don't mix. Always wear a personal flotation device when boating. Please operate your outboard safely and responsibly.

Suzuki encourages all users to operate their boats safely, responsibly, and with respect for the marine environment.

Specifications, appearances, equipment, colours, material and other items of "SUZUKI" products shown in this catalogue are subject to change by the manufacturers at any time without prior notice and may vary depending on local conditions or requirements. Some models and items are not available in some territories. Each model or item might be discontinued without notice. Please contact SMC for details of such changes. Actual body or item colour might differ from the colours in this catalogue.
